REMESA

REPARACIONES MARÍTIMAS ESPAÑOLAS, S.A.

...to cover the needs of the merchant fleet of today

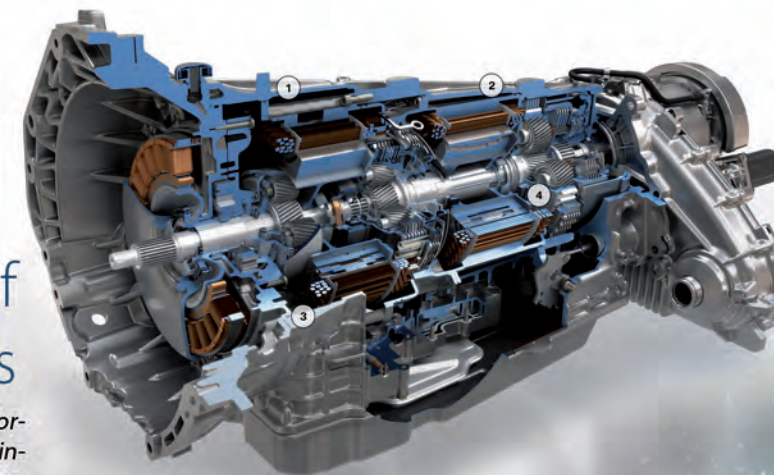

In 1989 a group of professional engineers from the merchant marine got together with the philosophy: Total quality in the job. That was when REMESA commenced its activities. The most important shipping companies, consignees, etc. can testify the constant dedication of our staff. If you have any technical problems with your vessels in The Straits of Gibraltar, you can rely on real professionals to solve them for you.

Port repairs

REMESA has its base next to the Straits of Gibraltar, in the Port of Algeciras, where we have been offering our services to all types of vessels for almost 22 years.

Repair of Electrical Motors

The repair service of electrical motors performed by REMESA is highly specialized. Rewinding of stators and rotors of all kind of motors, whether AC or DC, can be done. All motor are being tested before delivery to the client.

Diver works

Some repair jobs, due to their nature and location must necessarily be carried out by divers. Our divers teams are used to work under almost all kind of conditions.

Workshop

Our installations cover an area of 2000 m2 and are equipped with modern facilities. We supply portable equipment and tool for almost any kind of mechanical work.

Repairs on the Anchorage

By means of bages and launches we can perform repairjobs and transport our equipmente, staff and materials to your vessels while at anchor.

Weldings

All types of weldings can be performed i.e. renewal of repair of materials, pipes, plates, etc. of normal steel, stainless steel, marine steel, aluminium, yorcalbro (alubrass), etc. Our staff possess welding certificates issued by LRS, BV, DNV, GL, etc.

Pipe repair

Our specialist in pipe works are continuously manufacturing and repairing piping o almost all kinds sucks as for: loading/discharging, steam, salt water, fresh water, hydraulic, bilges, yorcalbro (alubrass), cunifer and titanium, etc.

Repairs in route

Wherever you need us we are willing to send our highly skilled technicians to help you solve your problems en route thus avoiding costly off service.
